

Fare Management Platform

What is a Fare Management Platform?

A Fare Management Platform is an integrated fare management solution for airlines to create, distribute, and monitor airfares expeditiously and accurately. ATI has developed a market leading Fare Management Solution called FMP that facilitates efficient review stages and distribution of fares which enables shorter time-to-market, providing attractive and best possible pricing for the right customers at the right time to maximise your airlines revenue.

Why Do You Need ATI's FMP Solution?

Integrated Efficient Workflow

FMP allows you to simplify negotiation and review stages within your organisation and upload specified fares and add-ons automatically to ATPCO, facilitating an efficient distribution of fares which enables shorter time-to-market.

Flexible Features Development

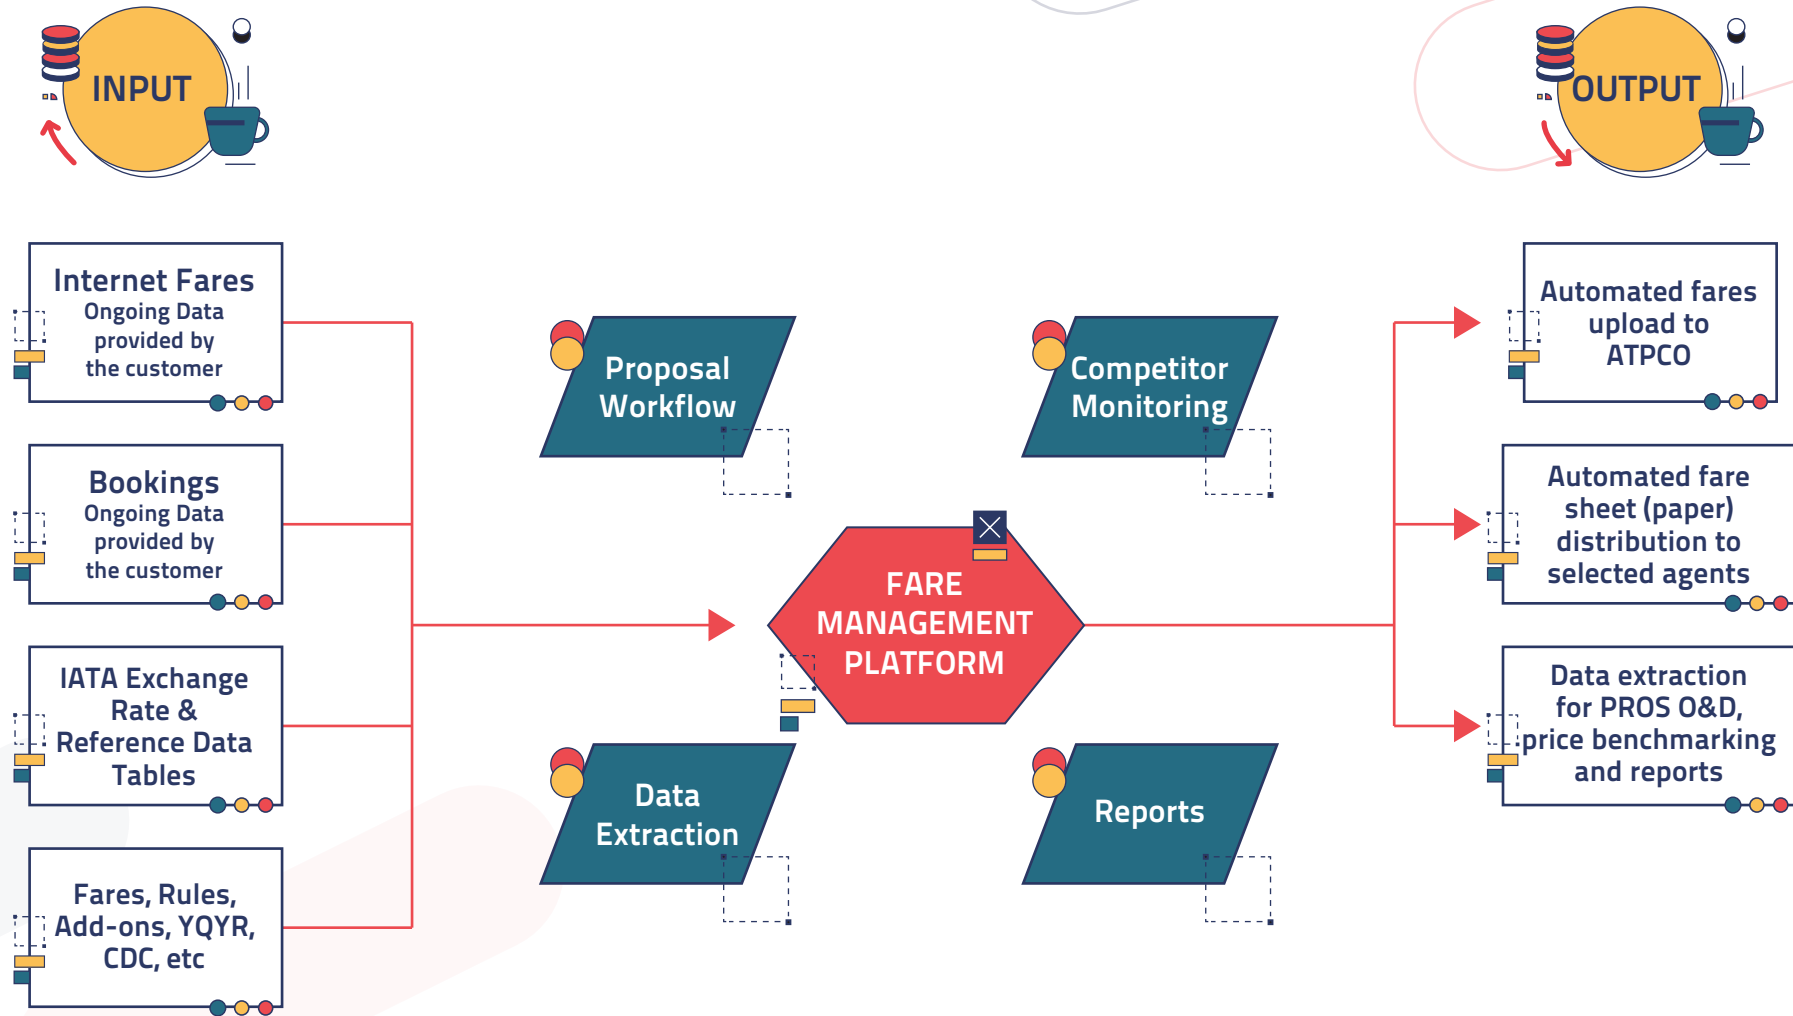

To cater to airline's specific business needs, FMP is equipped with custom developed features such as automatic creation of work orders, targeted competition monitoring, and customisable data feeds from various subscription and manual inputs, equipping airlines with comprehensive insights to determine pricing dynamically.

Competitive Market Pricing Insights

Understanding the need for airline fares to be competitive, FMP equips airlines with competitor monitoring and fare analysis features for comprehensive market pricing benchmarks, creating dynamic pricing strategy for airlines to remain competitive in the market.

The Functions of FMP

Key Features of FMP

Features

Description

Availability of Fare Management Platform

Allows you to efficiently execute critical functions pertaining to fares & pricing management and distribution

One-stop-shop

All necessary data such as fares, rules, add-ons, YQ/YR, taxes, exchange rates, internet fares, agencies, and market intelligence will be available to authorised users within a single system.

Smart automation

Runs smart algorithms on data loaded, to present the user with accurate, timely and user friendly information to efficiently execute competitor monitoring, targeted response and fare analysis functions.

Seamless Integration & Batch Upload

Enable you to perform competitor monitoring or fare analysis functions, and use this data to distribute to ATPCO using the systematic workflow management feature.

Rate Sheet Generation & Distribution

Automatically generate rate sheets from the system based on the fare details and rate sheet comments entered in the work order.

Data Feeds

Generate standard data feeds that will include ATPCO fares loaded through ATPCO subscriptions and Market fares distributed through the Work Orders.

Functions of Fare, Rules and Agent Database

Ability to store fares, rules and agencies information into the system's database. Provide competitor monitoring and fare analysis features for price benchmarking to remain competitive in the marketplace.

Key Features of FMP

Features

Searching and monitoring of price YQ, tax, & Airlines surcharge or competitor

Audit function (fare approval & detail pricing)

Negotiation function within the organisation

Searching and monitoring internet fares

Feed Data Function to Revenue Management System

Fare search based on approval code (tourcode)

Generate rate sheet for approval

Description

Provide competitor monitoring and fare analysis features for price benchmarking to remain competitive in the marketplace.

Provides a comprehensive and audit compliant workflow management tool that will automatically track and stamp every action.

Enables you to systematically execute end to end fare negotiation for approval and distribution processes between head office and branch office.

Provides the ability to load internet fares as per predefined frequency and schedule.

Enables you to extract a standard data feed to your airline's revenue management system.

Provides a tour/approval code query parameter to retrieve ATPCO and Market fares that have been distributed with an approval code (also known as tour code).

Enables authorised users to generate rate sheets (in standard document types such as Word, Excel, PDF) prior to approval based on the fare details and rate sheet comments entered within the Work Order.
