

# Software Developer Service

Background Story of Software Developer Service

# Software Developer Service

ATI's Software Developer Service offers the skilled resources you need with significantly lower cost. We integrate our specialised Developer expertise into your team to accelerate project timelines, support project requirements or meet critical deadlines - whether for additional support or niche development skills, our talent will seamlessly align with your processes to help achieve your business goals efficiently.

# Why ATI?

**Access to Specialized  
Development Skills**

**Cost-Effective Global  
Talent Solutions**

**Abundant Talent  
Resource Pool**

**Smooth Integration  
with Your Team**

ATI Business Group has long been a leader in business process outsourcing within the travel and aviation sector, serving clients in over 20 countries around the world. Focused on serving the best customer experience, ATI has developed several proprietary technology applications, backed with teams of industry experts to provide you an effective solution for sustainable efficiency and organisational growth.

# Service Options

## Backend Developers

Our backend developer resource pool are experts in the Java stack and building scalable, secure systems capable of handling complex logic and large-scale databases. They're also skilled in API development, ensuring seamless inter-system communication.

## Frontend Developers

Our frontend developer resource pool are proficient in frameworks like React, Next.js, and Vue.js, to create clean, intuitive user interfaces for responsive, engaging user experiences across all devices.

## Quality Control Engineers

Our Quality Control engineers resource pool are able to conduct thorough testing and validation to ensure peak performance and flawless functionality, going beyond standard testing to deliver superior quality and reliability.
